

Go to www.VenturaCastStone.com to learn more about our products, download our catalog and free CAD file of our profiles, templates and installation instructions.

Ventura Cast Stone, Inc is a family owned and managed business, specializing in the manufacture of architectural cast stone, precast concrete and GFRC lightweight pre-cast concrete, window/door trim, columns, balusters, pre-cast pool coping and landscape items. Sited in purpose built factory premises in Ventura County, the company is ideally located to distribute to the whole of the greater Los Angeles and Southern California area, we also ship Nationwide. We are one of the only manufacturers of (dry cast) Cast Stone in California and the only manufacturer of cast stone in the Los Angeles area.

We have 24 standard colors and 10 textures, and can also reproduce original ornamental limestone or sandstone colors and textures to match the original, We also design and produce traditional cast stone moldings. We have in-house installation crews of the highest quality who install our product mainly in the greater Los Angeles areas, including Santa Barbara and Ventura Counties, outside of these areas, most installations can be done by a local mason using our instruction booklet. We have a experienced in house designer who can help with the design and suggest cast stone profiles to match the architectural style of the house.

Our designer works closely with the architect, contractor and home owner to value engineer the project without losing the architects intent.

We also have a in house CAD draughtsman to generate a set of details for review and approval by the architect, homeowner or contractor.

Utilizing state of the art manufacturing techniques and materials, combined with old world craftsmanship our cast stone columns, precast columns, GFRC columns and products are not mass produced without any character, as most other companies manufacture them. Our product is hand cast in our own original textures and designs based on the classical formal cast stone profiles of Tuscany and Southern France, the informal precast concrete stone profiles of the Mediterranean and even the aged and weathered Cantera or Adoquin stone of old Mexico. Our variety of textures and colors is unsurpassed by anyone, hand-finished, with a choice of 10 incredible textures, some unseen before and 24 standard colors. On the color and texture pages there are examples of each, as well as a general written description. We also manufacture "Green" environmentally friendly GFRC, precast and cast stone products to help you attain your LEED® certification. Ventura Cast Stone, Inc is one of the most respected architectural precast, GFRC and cast stone companies based in the greater Los Angeles, California area. Unlike most companies, we are licensed, bonded, have general liability, workers compensation insurance, we have our own experienced installers and are recognized for our high quality craftsmanship, for finishing projects on schedule and within budget. We take pride in our work and our ability to relate to and relieve the concerns of the homeowner, architect, and contractor.
